

NED ALUMNI OF TEXAS

NEDEAN

BRINGS NEDIANS TOGETHER

SUMMER / FALL
NEWSLETTER 2025

OUR MISSION

To promote the interests of NED University of Engineering & Technology, Karachi, as a world-class institution by fostering strong connections among its alumni, students, faculty, and supporters.

WE'RE THE ALUMNI OF NEDUET IN DFW!

Welcome to the NEDEAN – NED Alumni of Texas 2025 Summer/Fall Newsletter. Our organization is a group of Alumni of NED University of Engineering & Technology ([website](https://www.neduet.edu.pk)) in Karachi, Pakistan currently residing in Dallas-Forth Worth metropolitan area in North Texas (<https://www.nedean.org>).

OUR VISION

To build a vibrant and engaged NED alumni community in Texas that empowers education, supports underprivileged students, fosters professional growth, and contributes to social impact both locally and globally.

Message from the Vice Chancellor NED University of Engg. & Technology, Karachi

Prof. Dr. Muhammad Tufail
Vice-Chancellor

NED UNIVERSITY OF ENGINEERING & TECHNOLOGY
UNIVERSITY ROAD, KARACHI # 75270, PAKISTAN

Tel: (92-21) 99261253, 99261262-68/2396
Fax: (92-21) 99261255
E-mail: vc@neduet.edu.pk
Website: <https://www.neduet.edu.pk>

It is a great pleasure to extend my warm greetings to **NEDEAN – NED Alumni of Texas**. As an alumnus of **NED University of Engineering and Technology**, having earned my degree in **Mechanical Engineering in 1991**, and now being appointed as the **Vice Chancellor of my alma mater**, I am deeply honored and humbled to serve the very institution that has shaped my journey from student to educator, and now to this esteemed position.

Over the course of my career, I have had the privilege of serving NED University in several leadership roles, including **Chairman of the Department of Industrial and Manufacturing Engineering**, **Dean of the Faculty of Mechanical and Manufacturing Engineering**, and **Pro Vice Chancellor**. Each of these roles has strengthened my commitment to advancing the University's academic excellence, fostering research, and enhancing the vital linkages between industry and academia. Today, as Vice Chancellor, I remain steadfast in my mission to guide NED University toward greater innovation, growth, and global recognition.

I would like to commend **NEDEAN** for its unwavering dedication to supporting our graduates and advancing the University's vision. Your initiatives — especially the **Engineers in Training (EIT) Program** for economically disadvantaged fresh NED graduates — are exemplary efforts that embody the spirit of service and unity among NEDians. These programs not only open doors to professional growth but also uphold the values of compassion and inclusivity that define our community.

On behalf of **NED University**, I extend my heartfelt appreciation to the vibrant alumni of **NEDEAN** for their tireless efforts in creating opportunities for our students, young alumni, and the Pakistani community in the DFW area. I encourage you to continue expanding these initiatives, as they serve as a vital bridge between our graduates' aspirations and their achievements. Together, we can ensure that NEDians across the globe remain a force for positive change, innovation, and excellence.

With warm regards and best wishes for **NEDEAN's** continued success,

Prof. Dr. Muhammad Tufail
Vice Chancellor

Message from the Chairman NEDEAN, NED Alumni of Texas

Dear Fellow NEDians,

It is always a pleasure to reconnect with you through our newsletter. NEDEAN continues to thrive as a vibrant community of engineers, professionals, and friends, united by the shared pride of our alma mater. Together, we not only keep the spirit of NED University alive but also build meaningful programs that create lasting impact.

Our flagship initiatives such as the Engineers in Training (EIT) Program, the NED Ashraf Habibullah Endowment Fund, and our growing partnerships with academia and industry reflect our collective vision to empower the next generation of engineers, especially those from underprivileged backgrounds. These efforts are opening doors to professional growth, innovation, and service to society, values that lie at the heart of NED

As we look ahead, I encourage you to stay engaged, share your ideas, and participate in our upcoming events. We are placing a renewed focus on professional development for both our alumni and the youth in our community. In this spirit, we are organizing a Professional Networking and Career Development event where alumni in senior positions will connect with younger NEDians to offer career advice, conduct mock interviews, and provide resume reviews. Please refer to the flyer in this newsletter for more details.

You will also find a schedule of our upcoming social events — a wonderful opportunity to reconnect and strengthen our community ties. Your active participation ensures that NEDEAN remains more than just an alumni network; it is a platform for mentorship, collaboration, and meaningful community impact.

My sincere thanks to the BOD and Advisors for their support in making our publications a reality. Special thanks to Yasmeen Hashmi for her creativity and deep sense of aesthetic, which is reflected on every page of this newsletter.

On behalf of the Board and Advisory Council, I extend my heartfelt gratitude for your continued support, dedication, and generosity. Let us move forward together, honoring our shared legacy and inspiring future generations of NEDians.

With warm regards,

Javaid Iqbal

Javaid Iqbal
Chairman NEDEAN,
NED Alumni of Texas

NED ALUMNI OF TEXAS

BOARD OF DIRECTORS & ADVISORS

DIRECTORS

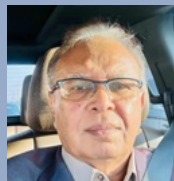

Javaid Iqbal
Chairman

Javaid has a B.E Civil Engineering from NED University and M.S. in the same discipline from University of Oklahoma. He is currently working as Director of Preconstruction Services for RPM Construction Group in McKinney, Texas

Ikhlas Ahmed
Vice Chairman

Ikhlas has a B.E. in Electrical Engineering from NED and M.S. in Computer Engineering from Wayne State University, Detroit. He is currently working for a mid-size consulting company overseeing their hybrid cloud practice

Afzaal Hafeez
Founding Member

Afzaal Hafeez has a B.E Civil Engineering from NED University. Currently working as Program Manager for a construction company.

Hanif Akhawala
Treasurer

Hanif has a B.E. in Mechanical Engineering from NED and M.S. in Industrial Engineering from University of Texas at Arlington. He is involved in social activities within Pakistani Community in Dallas

M.A Naeem Qureshi
Public Relations

Naeem has a B.E. in Mechanical Engineering from NED. He has more than 40 years of project management, construction and fabrication experience in Oil & Gas

ADVISORS

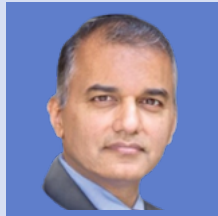

Erum Rahman

B.E in Computer Systems Engineering from NED. Extensive experience in technology and project management. Currently, working in health industry

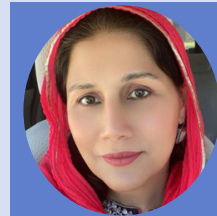

Amir Haque

Amir has a B.E. in Electrical Engineering from NED and M.S. in Computer Science from University of Illinois at Chicago. He is currently working as a Program Manager at Microsoft.

Zulfi Ahmed

Zulfi has a B.E. in Mechanical Engineering from NED. He is currently serving as SVP/Global CISO for HP. He has served as President of Samaritan Inn homeless shelter in Collin county and has written for Dallas Morning News

Fauzia Ahmed

B.E Computers Engineering. 20 years of experience as an IT professional in product and financial industries. Currently employed at Citibank as a business operations manager in production management

Yasmeen Hashmi

Yasmeen holds a Bachelor of Engineering degree in Civil Engineering and possesses twenty years of experience as a Structural Engineer. She is currently employed at Charles Gojer & Associates.

ENGINEERS-IN TRAINING (EIT) SPONSORSHIP PROGRAM

The Engineers-in Training (EIT) Sponsorship Program is one of NEDEAN's flagship initiatives, created with the vision of empowering socially and economically disadvantaged fresh graduates and bridging the gap between academia and industry.

Fresh graduates often face immense challenges when entering the job market—limited professional networks, lack of practical exposure, and underdeveloped soft skills. Many talented young engineers, especially those from modest backgrounds, struggle to find meaningful opportunities that align with their skills and education.

The EIT Program addresses these challenges head-on by sponsoring selected graduates for a six-month Engineer-in-Training placement with established engineering firms in Karachi. The program covers a monthly stipend equivalent to an entry-level salary, while host firms provide hands-on training and mentorship - all at no financial cost to the organizations. This creates a win-win: candidates gain professional exposure and mentorship, while firms get access to bright, motivated graduates they can evaluate as potential long-term hires.

Purpose and Benefits

The program focuses on supporting graduates from low- to middle-income families and aims to:

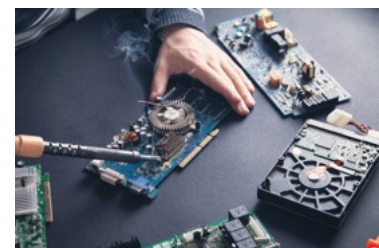

- Enhance both technical and soft skills such as time management, communication, and critical thinking.
- Provide meaningful work experience that increases employability.
- Offer host firms a chance to evaluate talent before making hiring decisions.

Progress and Achievements

Since its inception, the EIT Program has steadily gained momentum. The dedicated teams in Karachi and Dallas have worked tirelessly in unison, driven by the mission of creating opportunities for graduates who might otherwise be left behind.

Key milestones so far include:

- Transitioning the application and screening process fully online, ensuring transparency and accessibility.
- Signing MOUs with six leading engineering firms in Karachi

- Successfully placing three candidates into training programs.
- Providing continuous mentorship during placements to help candidates adapt to professional environments.
- Assuring positive outcomes, with candidates becoming competitive in the open job market.

The results speak for themselves. One of our first candidates secured a permanent role at double the stipend she initially received from EIT, midway through her training program. These early successes confirm that the program is meeting its mission—creating opportunities, enhancing employability, and changing lives.

Among these stories, one stands out as a powerful testament to human resilience and the role of EIT in transforming lives—the journey of **Sardar Wahab Khan**.

MY JOURNEY WITH NEDEAN-EIT

*“EIT IS NOT JUST A PROGRAM
IT IS A LIFELINE. THEY TURNED
MY DARKEST DAYS INTO A
NEW BEGINNING.”*

SAID WAHAB KHAN (EIT CANDIDATE)

By Sardar Wahab Khan, Civil Engineering Graduate
NED University (Class of 2024)

During my final semester at NED University, life took a turn I could never have imagined. I was run over by a bus, leaving my right leg badly injured while four of my final exams were still pending. My family urged me to defer, but I refused to give up. With the help of my parents, who brought me to campus in an ambulance every day, I completed my exams in a wheelchair.

The last exam remains etched in my memory as both the hardest and proudest day of my life. Despite bleeding, severe pain, shivering, and a 105°F fever, I sat through the exam hall and completed the paper—fulfilling my parents’ 22-year dream of seeing me graduate. Immediately afterward, I was admitted to the hospital, but I had achieved what I had fought for.

Six months later, as my leg began to heal, I came across the EIT Sponsorship Program. With renewed hope, I applied and was shortlisted. Just before the interview, however, I began to experience unbearable back pain. Tests revealed a disc bulge from the accident—an undiagnosed injury that left me unable to sit, travel, or even sleep properly. It felt like my professional career had ended before it even began.

But EIT never gave up on me. They interviewed me despite my condition, referred me to companies, and most importantly, never stopped checking on my health. The compassion and support I received from Sir Nayyar Mannan, Madam Yasmeen Hashmi, and Sir Javaid Iqbal reminded me of family. They made sure I never felt alone in my struggle.

In May 2025, EIT arranged for me to begin working remotely with Exponent Engineering. That opportunity became a turning point in my recovery. For the past three months, I have been working from home, and Alhamdulillah, I am steadily improving while gaining professional experience.

To me, EIT is not just a program—it is a lifeline. It gave me hope when I was close to giving up, encouragement when I felt lost, and a path to move forward. They turned my darkest days into a new beginning, and for that, I will always remember EIT with gratitude and prayers.

Stories like Wahab's remind us why the EIT Sponsorship Program is so important. It is not just about training engineers - it is about uplifting lives, building confidence, and creating opportunities where none existed before. NEDEAN remains committed to expanding this initiative, signing more partnerships with engineering firms, and opening doors for the next generation of NED graduates.

ENGINEERS-IN TRAINING (EIT) SPONSORSHIP PROGRAM

EIT TEAM - KARACHI PAKISTAN

Zahid Rasheed

Mr. Zahid Rasheed has a B.E. in Civil Engineering degree, graduated from NED in 1975. He retired as a divisional head from a Pakistan government enterprise and now serves as a technical adviser in Karachi for a reputable construction development firm based in Karachi.

Masroor Ahmed

Mr. Masroor Ahmed has a B.E. in Civil Engineering, graduated from NED in 1975. He has extensive experience in project management and control in Pakistan and overseas. He ran his own Project Management institute for more than 14 years, trained over 4,500 graduate engineers in project management using Primavera and Excel.

Nayyer Mannan

Mr. Nayyer Mannan has a B.E. in Civil Engineering degree, graduated from NED in 1977. He served as a design engineer and advisor with NESPAK on major infrastructure projects in Pakistan, Saudi Arabia, and the U.S. After retiring in 2011, he rejoined NESPAK in 2016 as an infrastructure advisor until 2021. Recently, he joined NESPAK again as a consultant.

EIT TEAM - DALLAS TX

Javaid Iqbal

Javaid has a B.E. Civil Engineering from NED University and M.S. in the same discipline from University of Oklahoma. He is currently working as Director of Preconstruction Services for RPM Construction Group in McKinney, Texas.

Yasmeen Hashmi

Yasmeen holds a Bachelor of Engineering degree in Civil Engineering and possesses twenty years of experience as a Structural Engineer. She is currently employed at Charles Gojor & Associates.

Tariq Nadeem

Tariq Nadeem has a B.E. in Mechanical Engineering and M.S. from Virginia Tech in the same discipline. He is currently working as Director of Aerospace and Defense Industry Solutions with Siemens Digital Industry Software in Plano, Texas.

Erum Rahman

B.E. in Computer Systems Engineering from NED. Extensive experience in technology and project management. Currently working in health industry.

We invite you to help us empower deserving fresh graduates from NED through our Engineers-in-Training (EIT) Program

Our goal for 2026 is to sponsor at least 10 underprivileged graduates by placing them in reputable engineering firms for six months of hands-on training, with a fully funded stipend.

Each participant receives a monthly salary of **PKR 50,000**, and to meet this target, we aim to raise approximately **\$11,000**.

How to Donate:

You can make your donation online

<https://www.nedean.org/donate/>

or make your donation using this QR code:

Your contribution, of any size, will directly help launch the careers of talented young engineers who simply need a fair opportunity. Thank you for your continued support and generosity.

NEDEAN TAKING A STEP TOWARDS PROFESSIONAL DEVELOPMENT FOR NED FRESH GRADUATES

Project Management Training –A new initiative by the NEDEAN EIT Team

For the past two years, NEDEAN has been providing employment opportunities to talented yet economically underprivileged fresh graduates through its fully sponsored six-month Engineers in Training (EIT) Program. This initiative has successfully enabled participants to gain practical experience and integrate into the mainstream job market, where they can compete with confidence.

Building on this success, NEDEAN is now proud to announce a new training initiative designed to further enhance the skill set and market value of fresh graduates. This program will focus on Project Management training, fully sponsored by NEDEAN for disadvantaged graduates, and offered at a nominal fee for those who are able to self-sponsor.

The training will cover Oracle Primavera Enterprise Enterprise Project Portfolio Management (EPPM) P6, equipping students with skills in:

- Preparing construction schedules
- Creating WBS and activity/ID codes
- Allocating resources and estimating man-hours

- Developing baseline schedules, updating and monitoring progress
- Analyzing cost and schedule variances
- Creating manpower histograms and S-curves
- Preparing catch-up and look-ahead schedules
- Generating reports and forecasts

We are honored to have Mr. Masroor Ahmed, a distinguished NED alumnus (Civil Engineering, Class of 1975) and esteemed member of the NEDEAN EIT Team, leading this program. With more than 40 years of experience in Project Management and Cost Control across large-scale projects in Pakistan and Saudi Arabia, Mr. Ahmed brings unparalleled expertise. He previously ran the Cadcom Institute of Project Management (2008–2012) before continuing his professional journey in Saudi Arabia.

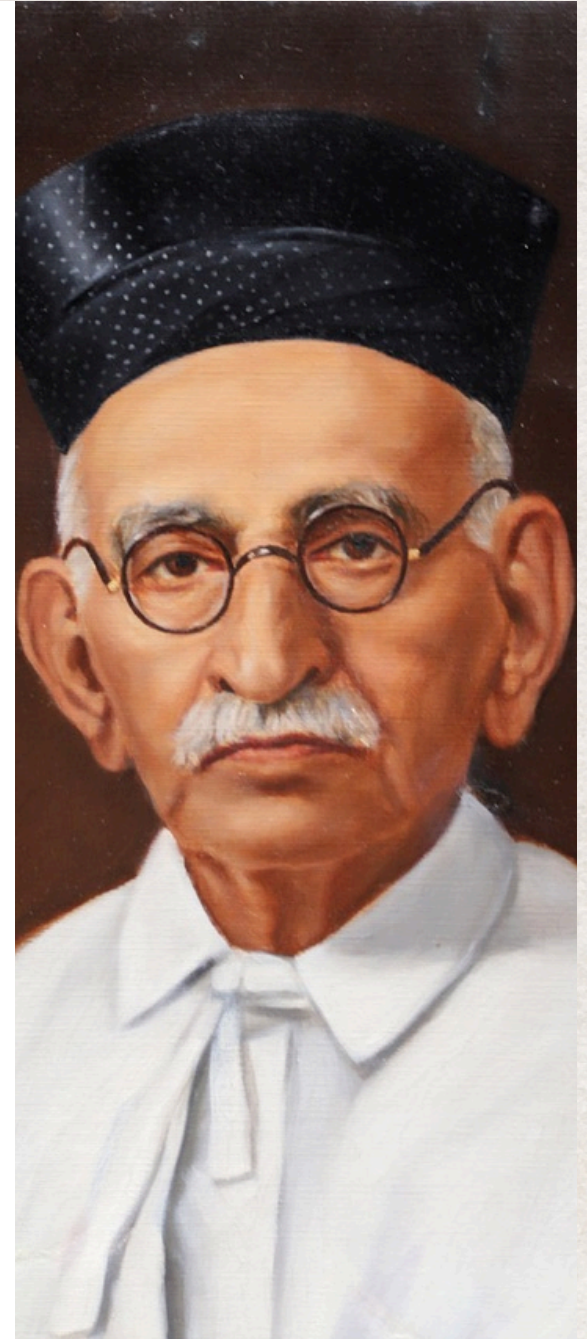

Through this initiative, NEDEAN reaffirms its commitment to empowering fresh graduates by bridging the gap between academics and industry, ensuring that NEDians remain competitive in the global workforce.

LEGACY ROOTED IN SERVICE - THE DINSHAW FAMILY:

The origin story of NED University is deeply rooted in Pakistan's engineering heritage and civic progress. Its foundations were laid in response to one of the most ambitious infrastructure projects of colonial India the Sukkur Barrage, a massive irrigation and water management project launched in the early 1920s. As this colossal undertaking advanced, it revealed a critical gap in the availability of locally trained engineers. The government responded by establishing a technical institution in Karachi in 1921, then called the Prince of Wales Engineering College. The institution was set up to train civil engineers capable of supporting the construction and future operation of the barrage and other public works across the region.

Yet the long-term success and stability of this college came not just from policy—but from philanthropy. The turning point came in 1924, when the college was renamed the NED (Nadirshaw Edulji Dinshaw) Government Engineering College, in honor of the monumental contribution of Mr. Nadirshaw Edulji Dinshaw, a prominent philanthropist and business magnate from Karachi's Parsi community.

Nadirshaw Edulji Dinshaw belonged to a distinguished family known for their civic-mindedness, enterprise, and generosity. He was the son of Edulji Dinshaw, one of the richest and most influential philanthropists in colonial Sindh. Continuing in his father's footsteps, Nadirshaw played a significant role in shaping Karachi's educational and health infrastructure. His endowment to the engineering college not only ensured its survival but also laid the foundation for its future growth. It enabled the expansion of facilities, procurement of equipment, recruitment of qualified faculty, and the advancement of technical education in the region.

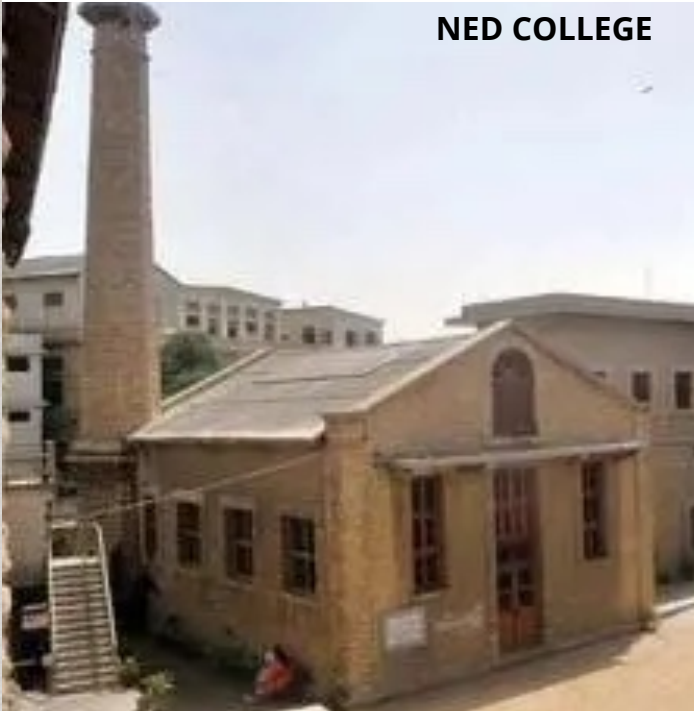

“The Foundation of NED was not only policy, but philanthropy that shaped a century of engineering education.”

LEGACY...

Beyond the NED College, Nadirshaw and the Dinshaw family left an enduring legacy through numerous other philanthropic works across Karachi and beyond:

- Edulji Dinshaw Dispensary: Built in 1882, this historic building in Saddar still stands as a testament to the family's commitment to public health.
- Lady Dufferin Hospital: The Dinshaw family were among the major donors to this iconic women's hospital in Karachi.
- Mama Parsi Girls' Secondary School: Founded in part by Edulji Dinshaw, the school advanced the cause of girls' education in a time when such opportunities were rare.
- Support for libraries, hostels, and Parsi community centers: Their philanthropy extended to the intellectual and cultural upliftment of the city's diverse communities.

"The Dinshaw family's legacy transformed Karachi's education, health, and civic landscape for generations."

NED COLLEGE

MAMA PARSI GIRLS SCHOOL

LADY DUFFERIN HOSPITAL KARACHI

LEGACY...

NED Today – A Living Legacy

In 1977, the institution evolved into a full-fledged university—NED University of Engineering & Technology—reflecting its broadened scope and national importance. Today, it stands as one of Pakistan's most respected institutions for engineering education, serving thousands of students across multiple campuses and disciplines.

The legacy of Nadirshaw Edulji Dinshaw is not merely etched into the university's name, it is embedded in its mission, values, and enduring impact on the nation. As students, alumni, and supporters of NED, we honor a heritage built on knowledge, service, and selfless giving—values championed by the Dinshaw family nearly a century ago.

Sukkur Barrage – An Engineering Marvel

- Commissioned: 1923
- Completed: 1932
- Designed by: Sir Arnold Musto
- Purpose: Irrigation of 7 million acres of farmland
- Legacy: Still operational; sparked the need for technical institutions like NED.
- The Dinshaw Family's Philanthropic Footprint
- Edulji Dinshaw Dispensary (1882). Located on Preedy Street, Saddar, Karachi
- It is still operational as a charitable dispensary for the Citizens of Pakistan

SUKKUR BARRAGE

Edulji Dinshaw Dispensary

IN MEMORIAM: ENGR. SYED ZAINUL ABIDEEN (1923–2025)

A Pioneer from NED who served the humanity.

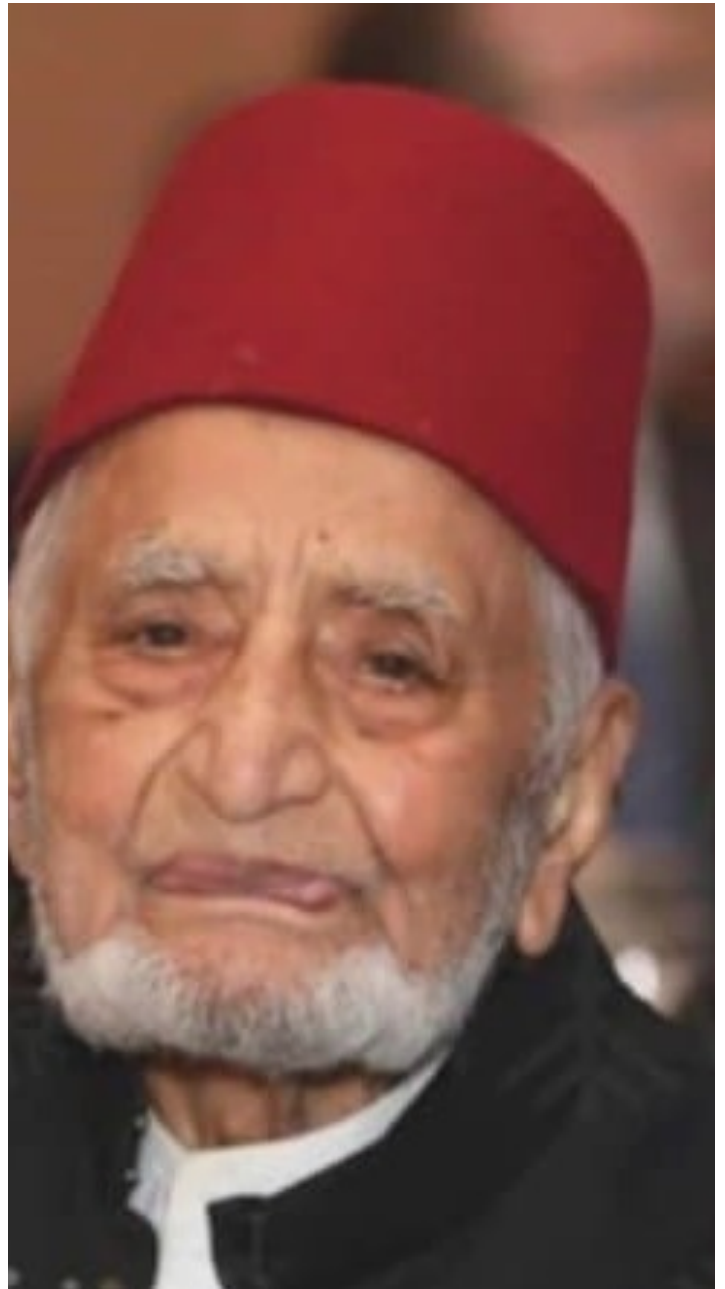

With deep respect, we remember Engineer Syed Zainul Abideen, one of the most senior alumni of NED Engineering College, who passed away earlier this year at the age of 101. His century-long life combined engineering brilliance, humility, and a spirit of service that touched countless lives.

Early Life and Education

Born on November 23, 1923, in Jaipur, India, Abideen faced hardship early when his father passed away during his school years. After Partition, he migrated to Pakistan and joined NED Engineering College, Karachi, completing his civil engineering degree in 1951 with the support of Prof. Rustom Mirza and a scholarship blessed by Quaid-e-Azam Muhammad Ali Jinnah.

Building Pakistan

Abideen began his career with the Karachi Municipal Corporation before joining WAPDA in 1959, where he played a pivotal role in constructing Rawal Dam, Pakistan's first major dam built without foreign aid. His name is engraved on a marble stone at the site. He is also believed to have contributed to Warsak and Tarbela Dam projects. Alongside his career, he pursued graduate studies in civil engineering, reflecting his lifelong passion for learning.

IN MEMORIAM: . . .

Global Engineering Career

In 1970, Abideen moved to the U.S., working with firms such as Chas T. Main and Louis Berger International. His work took him to Iran, Sri Lanka, South Korea, and the U.S., where he spent two decades contributing to major water and infrastructure projects. He earned his Professional Engineer license in Massachusetts in 1989.

A Life of Simplicity and Faith

Despite his professional stature, Abideen lived humbly. After retirement, he resided in a modest retirement home in Boston, living independently into his late 90s. A devout man, he prayed daily, fasted throughout Ramadan, and centered his life around faith.

Silent Humanitarian

Few knew of his generosity: he quietly supported eight families in Karachi, sending much of his U.S. pension for their basic needs. His giving was consistent, heartfelt, and anonymous — an enduring example of compassion in action.

NED Centennial Appearance

In 2022, at nearly 99, Abideen traveled from Boston to Karachi to attend NED University's 100th Anniversary as its most senior living alumnus. His presence was a highlight of the celebration, where he prayed for the alumni community and shared words of wisdom. True to his nature, he sought no recognition and remained gracious and composed.

Legacy

From Rawal Dam to international projects, Abideen's professional legacy spanned continents. Equally important was his desire to give back to Pakistan, even in his later years, offering to help refurbish small dams free of cost. His life embodied intellect, service, and humility — qualities that will continue to inspire NEDEANS for generations.

Engr. Syed Zainul Abideen's story reminds us that greatness is not measured by titles or wealth but by what we give to others. "The true measure of greatness is in what we give, not what we receive." — Engr. Syed Zainul Abideen. May his soul rest in eternal peace.

EID MILAN PARTY

FLASH BACK

MAY 11TH, 2025

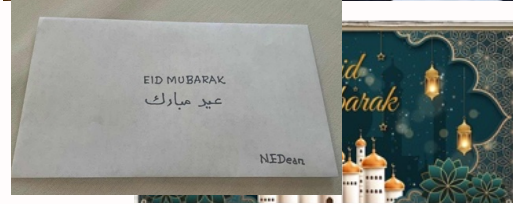

NEDEAN Eid Millan Party 2025

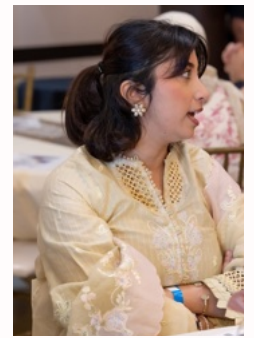

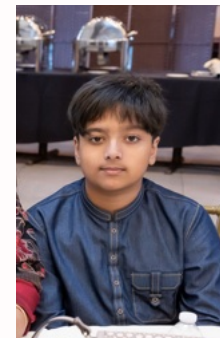

The NED Alumni Association of Texas (NEDEAN) successfully organized its annual Eid Millan Party on May 11, 2025, at Signature Kabab & Grill, Plano. The gathering was well attended, with over 100 alumni and their families attending the celebration.

The event featured an elegant ambiance with floral centerpieces, candles on glass mats, and a beautifully decorated stage backdrop. A creative arrangement of cubes on stage conveyed the message "EID with NED", while large chandeliers with a draped ceiling added to the festive atmosphere.

Guests enjoyed a variety of delicious cuisine and engaged in interactive sessions, during which alumni shared lighthearted and nostalgic memories from their student life at NED University. Special arrangements were made for children, including stickers, mehndi stalls, and an Eidi distribution activity, where young participants showcased their talents in exchange for gifts. The Eid Millan Party 2025 provided an opportunity for alumni to reconnect, celebrate the joyous occasion of Eid, and strengthen their bond as part of the NEDian community in Texas.

YOUTH VOLUNTEERS BRING WARMTH AND JOY TO EID MILAN

*The
hard work,
energy
and spirit of our
youth are what make
NEDEAN
event truly special.*

We extend our heartfelt appreciation to the young volunteers whose efforts made the Eid Milan Party both memorable and successful.

A special thank you goes to Faatheh, Wajeih, and Abyaan for managing guest registration with such efficiency and warmth, ensuring a smooth and welcoming start for everyone.

We were deeply moved by Azlan Hashmi's beautiful recitation of the Quran, which blessed the gathering and "filled the atmosphere with peace and reflection.

Our sincere gratitude also goes to Noor Samad a and Imaan for their creativity and dedication at the mehndi corner. Their enthusiasm and artistic flair in offering a variety of mehndi designs brought immense joy to our guests.

The hard work, energy, and spirit of our youth are what make NEDEAN events truly special. Their contributions are not only valued but celebrated by the entire community.

Volunteer Opportunities

Volunteer with NEDEAN and Make an Impact

High school students getting ready to enter the next phase of education, university admissions, volunteering gives much more than hours on an application: it offers meaningful and deeper experience reflecting genuine commitment and leadership.

NEDEAN – NED Alumni of Texas, a 501(c)(3) non-profit organization, proudly supports students through volunteer opportunities, community service, and education empowerment. Endowment scholarship funds with UTD and EIT programs demonstrate testaments to their commitment to community development.

Why are Volunteer Hours Important?

High schools require a certain number of service hours to graduate, while others encourage it as a way to promote civic responsibility. But beyond fulfilling requirements, volunteering helps students develop skills, explore career paths, and make a positive impact in their communities.

More Than Just Hours Quality Counts

Volunteering offers hands-on experience, personal growth, and community impact, improving career exploration, leadership skills, and mental well-being.

In Memoriam: Dr. Jameel Ahmed Khan (1938–2025)

Dr. Jameel Ahmed Khan, a distinguished academic, visionary leader, and dedicated mentor, passed away on Friday, August 22, 2025 (Inna Lillahi wa Inna Ilayhi Raj'oon).

He served as Vice Chancellor of NED University of Engineering and Technology (1987–1991) and earlier as Chairman and Professor of Mechanical Engineering. From 1999 to 2010, he was honored as Professor Emeritus, leaving a lasting mark on engineering education and research in Pakistan. Beyond NED, he contributed nationally as a two-term Chairman of the Pakistan Engineering Council (1997–1999, 2000–2002) and as the Founder President of the Pakistan Academy of Engineering, where he championed the advancement of professional engineering institutions across the country.

Dr. Jameel Ahmed Khan's passing is a profound loss to the engineering and academic community of Pakistan. His visionary leadership, lifelong dedication, and enduring contributions will continue to inspire generations of engineers.
